# Accessories
## For AI Products

## 1 Prepare the RFID reader for use

**1** Charge the reader's battery using the included micro-USB cable.

**2** Turn on both the reader and its Bluetooth by pressing and holding the on/off button.
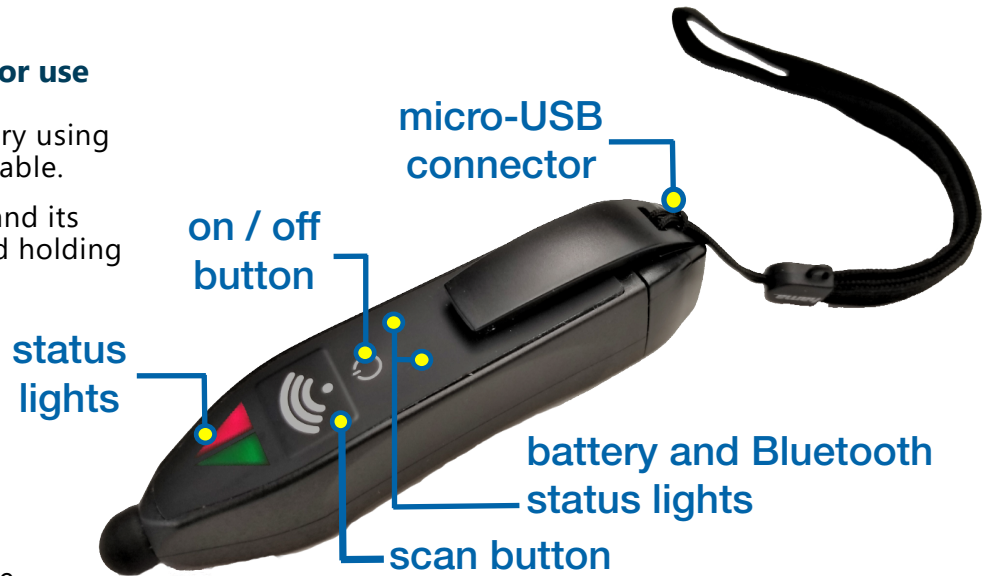

Once Bluetooth has been activated, a blue indicator light displays on the top of the reader, near the on/off button.

## 2 Connect with Allegro

**1** In the Bluetooth COM application, tap **Discover Devices** and select iID PENsolid. Note the COM port used; you will need to select it in step **3**.

**2** Tap **Connect**.

## 3 Select COM Port in Allegro Periodic Survey Application

**1** On the Allegro, open the Periodic Survey applications. Tap **View** and then **Options** and then the **RFID** tab.

**2** Select **microsensys** from the list in the **Model** field.

**3** Select the COM port that was assigned to the reader in step **2**.

**4** Refer to the *Allegro User Guide* for more information on using the RFID reader and assigning RFID tags to a site.
